

Your journey to publication just got faster and easier

You spoke. We listened. Your Feedback matters - explore the new submission process.

Introducing the new submission process for the ASN Journal Portfolio (*JASN*®, *CJASN*®, and *Kidney360*®). Take your manuscript from draft to publication with this new streamlined process, including:

- ✓ **Simplified submission process** designed to save you time:
 - Upload a format-free initial submission.
 - Submit your manuscript as a Word document, and the system will automatically enter the title, abstract, and author names into the submission form.
 - Answer fewer questions during the initial submission of Original Research Articles.
- ✓ **Direct transfers between ASN journals:** When submitting your manuscript, indicate your preference to transfer it to another ASN journal. We'll handle the rest!
- ✓ **Preprint transfers:** Submit your manuscript directly to an ASN journal from medRxiv, bioRxiv, or ChronosHub.
- ✓ **Presubmission inquiries:** Have an idea for an article? Submit your idea, and the editors will let you know which journal is the right fit.

Accelerate your path to publication! Get started.
