Dear Dr. Sloane:

Enclosed is a copy of my paper,

"Enumeration of Generalized Weak Orders," submitted  
to the Proceedings of the 11th Southeastern Conference  
on Combinatorics, Graph Theory, and  
Computing. I was unable to find the  
sequences  $W(n)$ ,  $M(n)$ , or  $T(n)$  in your  
Handbook and thought you might be  
interested in listing them in a supplement.  
The sequence  $P(n)$  is, of course, well known.

If you have already issued any supplements  
I would appreciate receiving copies.

With best regards,

Carl Wagner

Dear Dr. Wagner:

Thank you very much indeed for the new sequences. There has been only one Supplement, and I am now working on the second edition.

Best regards,

MH-1216-NJAS-mv

N. J. A. Sloane
