Supplementary Figure 2

Supplementary Figure 2. Mean particle size (mm²) per experimental condition presented by distance from source. Experimental rig (0, 0.5, 1, 1.5, 2, 2.5, 3, 3.5, 4 m) and mannequin (0.4 and 0.65 m) samples were included. Data presented on a logarithmic (base 10) scale. For each data point, the maximum value recorded from the three repetitions of each clinical procedure was used.
