The Talk Page

Talk to *Wiri*, obviously named after "Wiki" with an "r", and nothing else!
Wiri requires a modern browser (Chrome, others to follow) for the speech interface; otherwise, just type your questions.

data resolution is one month:
if a user started in same month
on a wikivoyage project and
some other Wikimedia
project it is classified as
'new to Wikimedia'

Statistics

- 3900 active users

Use Common Sense

"This policy is simple: Use common sense.

This policy applies to everything on Wikidata, including editing, interactions with other editors and interpreting other policies.

If another policy or guideline prevents a useful contribution to Wikidata, use common sense and ignore it."

Notability

- Policy is intentionally vague
- User pages not allowed
- Non-free images not allowed
- Some items explicitly excluded like category redirects
- "structural items" - anything needed to complete a tree

Sourcing

- Discussions about what needs sourcing, and how to source
- Guidelines in progress at [[d:Help:Sources]]
- "imported from [language] Wikipedia"
- Waiting on URL datatype

"main type" (p107)

- p107 is used 4,137,386 times
- 2 deletion requests (no consensus)
- In favor: Wikidata can have as many "main types" as we want, just create more properties for them
- Against: Forces data to be categorized into 7 arbitrary types and has no advantages over "instance of"
