Subtitle E—Delaware River Basin Conservation

SEC. 3501. FINDINGS.

Congress finds that—

(1) the Delaware River Basin is a national treasure of great cultural, environmental, ecological, and economic importance;

(2) the Basin contains over 12,500 square miles of land in the States of Delaware, New Jersey, New York, and Pennsylvania, including nearly 800 square miles of bay and more than 2,000 tributary rivers and streams;

(3) the Basin is home to more than 8,000,000 people who depend on the Delaware River and the Delaware Bay as an economic engine, a place of recreation, and a vital habitat for fish and wildlife;

(4) the Basin provides clean drinking water to more than 15,000,000 people, including New York City, which relies on the Basin for approximately half of the drinking water supply of the city, and Philadelphia, whose most significant threat to the drinking water supply of the city is loss of forests and other natural cover in the Upper Basin, according to a study conducted by the Philadelphia Water Department;

(5) the Basin contributes $25,000,000,000 annually in economic activity, provides $21,000,000,000 in ecosystem goods and services per year, and is directly or indirectly responsible for 600,000 jobs with $10,000,000,000 in annual wages;

(6) almost 180 species of fish and wildlife are considered special status species in the Basin due to habitat loss and degradation, particularly sturgeon, eastern oyster, horseshoe crabs, and red knots, which have been identified as unique species in need of habitat improvement;

(7) the Basin provides habitat for over 200 resident and migrant fish species, includes significant recreational fisheries, and is an important source of eastern oyster, blue crab, and the largest population of the American horseshoe crab;

(8) the annual dockside value of commercial eastern oyster fishery landings for the Delaware Estuary is nearly $4,000,000, making it the fourth most lucrative fishery in the Delaware River Basin watershed, and proven management strategies are available to increase oyster habitat, abundance, and harvest;

(9) the Delaware Bay has the second largest concentration of shorebirds in North America and is designated as one of the 4 most important shorebird migration sites in the world;

(10) the Basin, 50 percent of which is forested, also has over 700,000 acres of wetland, more than 126,000 acres of which are recognized as internationally important, resulting in a landscape that provides essential ecosystem services, including recreation, commercial, and water quality benefits;

(11) much of the remaining exemplary natural landscape in the Basin is vulnerable to further degradation, as the Basin

gains approximately 10 square miles of developed land annually, and with new development, urban watersheds are increasingly covered by impervious surfaces, amplifying the quantity of polluted runoff into rivers and streams;

(12) the Delaware River is the longest undammed river east of the Mississippi; a critical component of the National Wild and Scenic Rivers System in the Northeast, with more than 400 miles designated; home to one of the most heavily visited National Park units in the United States, the Delaware Water Gap National Recreation Area; and the location of 6 National Wildlife Refuges;

(13) the Delaware River supports an internationally renowned cold water fishery in more than 80 miles of its northern headwaters that attracts tens of thousands of visitors each year and generates over $21,000,000 in annual revenue through tourism and recreational activities;

(14) management of water volume in the Basin is critical to flood mitigation and habitat for fish and wildlife, and following 3 major floods along the Delaware River since 2004, the Governors of the States of Delaware, New Jersey, New York, and Pennsylvania have called for natural flood damage reduction measures to combat the problem, including restoring the function of riparian corridors;

(15) the Delaware River Port Complex (including docking facilities in the States of Delaware, New Jersey, and Pennsylvania) is one of the largest freshwater ports in the world, the Port of Philadelphia handles the largest volume of international tonnage and 70 percent of the oil shipped to the East Coast, and the Port of Wilmington, a full-service deepwater port and marine terminal supporting more than 12,000 jobs, is the busiest terminal on the Delaware River, handling more than 400 vessels per year with an annual import/export cargo tonnage of more than 4,000,000 tons;

(16) the Delaware Estuary, where freshwater from the Delaware River mixes with saltwater from the Atlantic Ocean, is one of the largest and most complex of the 28 estuaries in the National Estuary Program, and the Partnership for the Delaware Estuary works to improve the environmental health of the Delaware Estuary;

(17) the Delaware River Basin Commission is a Federal-interstate compact government agency charged with overseeing a unified approach to managing the river system and implementing important water resources management projects and activities throughout the Basin that are in the national interest;

(18) restoration activities in the Basin are supported through several Federal and State agency programs, and funding for those important programs should continue and complement the establishment of the Delaware River Basin Restoration Program, which is intended to build on and help coordinate restoration and protection funding mechanisms at the Federal, State, regional, and local levels; and

(19) the existing and ongoing voluntary conservation efforts in the Delaware River Basin necessitate improved efficiency and cost effectiveness, as well as increased private-sector investments and coordination of Federal and non-Federal resources.

Subtitle J—California Water

SEC. 4001. OPERATIONS AND REVIEWS.

(a) WATER SUPPLIES.—The Secretary of the Interior and Secretary of Commerce shall provide the maximum quantity of water supplies practicable to Central Valley Project agricultural, municipal and industrial contractors, water service or repayment contractors, water rights settlement contractors, exchange contractors, refuge contractors, and State Water Project contractors, by approving, in accordance with applicable Federal and State laws (including regulations), operations or temporary projects to provide additional water supplies as quickly as possible, based on available information.

(b) ADMINISTRATION.—In carrying out subsection (a), the Secretary of the Interior and Secretary of Commerce shall, consistent with applicable laws (including regulations)—

(1)(A) in close coordination with the California Department of Water Resources and the California Department of Fish and Wildlife, implement a pilot project to test and evaluate the ability to operate the Delta cross-channel gates daily or as otherwise may be appropriate to keep them open to the greatest extent practicable to protect out-migrating salmonids, manage salinities in the interior Delta and any other water quality issues, and maximize Central Valley Project and State Water Project pumping, subject to the condition that the pilot project shall be designed and implemented consistent with operational criteria and monitoring criteria required by the California State Water Resources Control Board; and

(B) design, implement, and evaluate such real-time monitoring capabilities to enable effective real-time operations of the cross channel in order efficiently to meet the objectives described in subparagraph (A);

(2) with respect to the operation of the Delta cross-channel gates described in paragraph (1), collect data on the impact of that operation on—

(A) species listed as threatened or endangered under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.);

(B) water quality; and

(C) water supply benefits;

(3) collaborate with the California Department of Water Resources to install a deflection barrier at Georgiana Slough and the Delta Cross Channel Gate to protect migrating salmonids, consistent with knowledge gained from activities carried out during 2014 and 2015;

(4) upon completion of the pilot project in paragraph (1), submit to the Senate Committees on Energy and Natural Resources and Environment and Public Works and the House Committee on Natural Resources a written notice and explanation on the extent to which the gates are able to remain open and the pilot project achieves all the goals set forth in paragraphs (1) through (3);

(5) implement turbidity control strategies that may allow for increased water deliveries while avoiding jeopardy to adult Delta smelt (Hypomesus transpacificus);

(6) in a timely manner, evaluate any proposal to increase flow in the San Joaquin River through a voluntary sale, transfer, or exchange of water from an agency with rights to divert water from the San Joaquin River or its tributaries;

(7) adopt a 1:1 inflow to export ratio for the increment of increased flow, as measured as a 3-day running average at Vernalis during the period from April 1 through May 31, that results from the voluntary sale, transfer, or exchange, unless the Secretary of the Interior and Secretary of Commerce determine in writing that a 1:1 inflow to export ratio for that increment of increased flow will cause additional adverse effects on listed salmonid species beyond the range of the effects anticipated to occur to the listed salmonid species for the duration of the salmonid biological opinion using the best scientific and commercial data available; and subject to the condition that any individual sale, transfer, or exchange using a 1:1 inflow to export ratio adopted under the authority of this section may only proceed if—

(A) the Secretary of the Interior determines that the environmental effects of the proposed sale, transfer, or exchange are consistent with effects permitted under applicable law (including the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.), the Federal Water Pollution Control Act (33 U.S.C. 1381 et seq.), and the Porter-Cologne Water Quality Control Act (California Water Code 13000 et seq.));

(B) Delta conditions are suitable to allow movement of the acquired, transferred, or exchanged water through the Delta consistent with existing Central Valley Project and State Water Project permitted water rights and the requirements of subsection (a)(1)(H) of the Central Valley Project Improvement Act; and

(C) such voluntary sale, transfer, or exchange of water results in flow that is in addition to flow that otherwise

would occur in the absence of the voluntary sale, transfer, or exchange;

(8)(A) issue all necessary permit decisions during emergency consultation under the authority of the Secretary of the Interior and Secretary of Commerce not later than 60 days after receiving a completed application by the State to place and use temporary barriers or operable gates in Delta channels to improve water quantity and quality for State Water Project and Central Valley Project south-of-Delta water contractors and other water users, which barriers or gates shall provide benefits for species protection and in-Delta water user water quality, provided that they are designed so that, if practicable, formal consultations under section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) are not necessary; and

(B) take longer to issue the permit decisions in subparagraph (A) only if the Secretary determines in writing that an Environmental Impact Statement is needed for the proposal to comply with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.);

(9) allow and facilitate, consistent with existing priorities, water transfers through the C.W. "Bill" Jones Pumping Plant or the Harvey O. Banks Pumping Plant from April 1 to November 30;

(10) require the Director of the United States Fish and Wildlife Service and the Commissioner of Reclamation to—

(A) determine if a written transfer proposal is complete within 30 days after the date of submission of the proposal. If the contracting district or agency or the Secretary determines that the proposal is incomplete, the district or agency or the Secretary shall state with specificity what must be added to or revised for the proposal to be complete;

(B) complete all requirements under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and the Endangered Species Act of 1973 (16 U.S.C. et seq.) necessary to make final permit decisions on water transfer requests in the State, not later than 45 days after receiving a completed request;

(C) take longer to issue the permit decisions in subparagraph (B) only if the Secretary determines in writing that an Environmental Impact Statement is needed for the proposal to comply with the National Environmental Policy Act of 1969 (42 U.S.C. et seq.), or that the application is incomplete pursuant to subparagraph (A); and

(D) approve any water transfer request described in subparagraph (A) to maximize the quantity of water supplies on the condition that actions associated with the water transfer are consistent with—

(i) existing Central Valley Project and State Water Project permitted water rights and the requirements of section 3405(a)(1)(H) of the Central Valley Project Improvement Act; and

(ii) all other applicable laws and regulations;

(11) in coordination with the Secretary of Agriculture, enter into an agreement with the National Academy of Sciences to conduct a comprehensive study, to be completed not later than 1 year after the date of enactment of this subtitle, on the effectiveness and environmental impacts of salt cedar biological

control efforts on increasing water supplies and improving riparian habitats of the Colorado River and its principal tributaries, in the State of California and elsewhere;

(12) pursuant to the research and adaptive management procedures of the smelt biological opinion and the salmonid biological opinion use all available scientific tools to identify any changes to the real-time operations of Bureau of Reclamation, State, and local water projects that could result in the availability of additional water supplies; and

(13) determine whether alternative operational or other management measures would meet applicable regulatory requirements for listed species while maximizing water supplies and water supply reliability; and

(14) continue to vary the averaging period of the Delta Export/Inflow ratio, to the extent consistent with any applicable State Water Resources Control Board orders under decision D–1641, to operate to a

(A) ratio using a 3-day averaging period on the rising limb of a Delta inflow hydrograph; and

(B) 14-day averaging period on the falling limb of the Delta inflow hydrograph.

(c) OTHER AGENCIES.—To the extent that a Federal agency other than the Department of the Interior and the Department of Commerce has a role in approving projects described in subsections (a) and (b), this section shall apply to the Federal agency.

(d) ACCELERATED PROJECT DECISION AND ELEVATION.—

(1) IN GENERAL.—On request of the Governor of California, the Secretary of the Interior and Secretary of Commerce shall use the expedited procedures under this subsection to make final decisions relating to Federal or federally approved projects or operational changes proposed pursuant to subsections (a) and (b) to provide additional water supplies or otherwise address emergency drought conditions.

(2) REQUEST FOR RESOLUTION.—Not later than 7 days after receiving a request of the Governor of California, the Secretaries referred to in paragraph (1), or the head of another Federal agency responsible for carrying out a review of a project, as applicable, the Secretary of the Interior shall convene a final project decision meeting with the heads of all relevant Federal agencies to decide whether to approve a project to provide emergency water supplies or otherwise address emergency drought condition.

(3) NOTIFICATION.—Upon receipt of a request for a meeting under this subsection, the Secretary of the Interior shall notify the heads of all relevant Federal agencies of the request, including a description of the project to be reviewed and the date for the meeting.

(4) DECISION.—Not later than 10 days after the date on which a meeting is requested under paragraph (2), the head of the relevant Federal agency shall issue a final decision on the project.

(2) MEETING CONVENED BY SECRETARY.—The Secretary of the Interior may convene a final project decision meeting under this subsection at any time, at the discretion of the Secretary, regardless of whether a meeting is requested under paragraph (2).

(3) LIMITATION.—The expedited procedures under this subsection apply only to—

(A) proposed new Federal projects or operational changes pursuant to subsection (a) or (b); and

(B) the extent they are consistent with applicable laws (including regulations).

(e) OPERATIONS PLAN.—The Secretaries of Commerce and the Interior, in consultation with appropriate State officials, shall develop an operations plan that is consistent with the provisions of this subtitle and other applicable Federal and State laws, including provisions that are intended to provide additional water supplies that could be of assistance during the current drought.

SEC. 4002. SCIENTIFICALLY SUPPORTED IMPLEMENTATION OF OMR FLOW REQUIREMENTS.

(a) IN GENERAL.—In implementing the provisions of the smelt biological opinion and the salmonid biological opinion, the Secretary of the Interior and the Secretary of Commerce shall manage reverse flow in Old and Middle Rivers at the most negative reverse flow rate allowed under the applicable biological opinion to maximize water supplies for the Central Valley Project and the State Water Project, unless that management of reverse flow in Old and Middle Rivers to maximize water supplies would cause additional adverse effects on the listed fish species beyond the range of effects anticipated to occur to the listed fish species for the duration of the applicable biological opinion, or would be inconsistent with applicable State law requirements, including water quality, salinity control, and compliance with State Water Resources Control Board Order D–1641 or a successor order.

(b) REQUIREMENTS.—If the Secretary of the Interior or Secretary of Commerce determines to manage rates of pumping at the C.W. "Bill" Jones and the Harvey O. Banks pumping plants in the southern Delta to achieve a reverse OMR flow rate less negative than the most negative reverse flow rate prescribed by the applicable biological opinion, the Secretary shall—

(1) document in writing any significant facts regarding real-time conditions relevant to the determinations of OMR reverse flow rates, including—

(A) targeted real-time fish monitoring in the Old River pursuant to this section, including as it pertains to the smelt biological opinion monitoring of Delta smelt in the vicinity of Station 902;

(B) near-term forecasts with available salvage models under prevailing conditions of the effects on the listed species of OMR flow at the most negative reverse flow rate prescribed by the biological opinion; and

(C) any requirements under applicable State law; and

(2) explain in writing why any decision to manage OMR reverse flow at rates less negative than the most negative reverse flow rate prescribed by the biological opinion is necessary to avoid additional adverse effects on the listed fish species beyond the range of effects anticipated to occur to the listed fish species for the duration of the applicable biological opinion, after considering relevant factors such as—

(A) the distribution of the listed species throughout the Delta;

(B) the potential effects of high entrainment risk on subsequent species abundance;

(C) the water temperature;

(D) other significant factors relevant to the determination, as required by applicable Federal or State laws;

(E) turbidity; and

(F) whether any alternative measures could have a substantially lesser water supply impact.

(c) LEVEL OF DETAIL REQUIRED.—The analyses and documentation required by this section shall be comparable to the depth and complexity as is appropriate for real time decision-making. This section shall not be interpreted to require a level of administrative findings and documentation that could impede the execution of effective real time adaptive management.

(d) FIRST SEDIMENT FLUSH.—During the first flush of sediment out of the Delta in each water year, and provided that such determination is based upon objective evidence, notwithstanding subsection (a), the Secretary of the Interior shall manage OMR flow pursuant to the provisions of the smelt biological opinion that protects adult Delta smelt from the first flush if required to do so by the smelt biological opinion.

(e) CONSTRUCTION.—The Secretary of the Interior and the Secretary of Commerce are authorized to implement subsection (a) consistent with the results of monitoring through Early Warning Surveys to make real time operational decisions consistent with the current applicable biological opinion.

(f) CALCULATION OF REVERSE FLOW IN OMR.—Within 180 days of the enactment of this subtitle, the Secretary of the Interior is directed, in consultation with the California Department of Water Resources, and consistent with the smelt biological opinion and the salmonid biological opinion, to review, modify, and implement, if appropriate, the method used to calculate reverse flow in Old and Middle Rivers, for implementation of the reasonable and prudent alternatives in the smelt biological opinion and the salmonid biological opinion, and any succeeding biological opinions.

SEC. 4003. TEMPORARY OPERATIONAL FLEXIBILITY FOR STORM EVENTS.

(a) IN GENERAL.—

(1) Nothing in this subtitle authorizes additional adverse effects on listed species beyond the range of the effects anticipated to occur to the listed species for the duration of the smelt biological opinion or salmonid biological opinion, using the best scientific and commercial data available.

(2) When consistent with the environmental protection mandate in paragraph (1) while maximizing water supplies for Central Valley Project and State Water Project contractors, the Secretary of the Interior and the Secretary of Commerce, through an operations plan, shall evaluate and may authorize the Central Valley Project and the State Water Project, combined, to operate at levels that result in OMR flows more negative than the most negative reverse flow rate prescribed by the applicable biological opinion (based on United States Geological Survey gauges on Old and Middle Rivers) daily average as described in subsections (b) and (c) to capture peak flows during storm-related events.

(b) FACTORS TO BE CONSIDERED.—In determining additional adverse effects on any listed fish species beyond the range of effects anticipated to occur to the listed fish species for the duration of the smelt biological opinion or salmonid biological opinion, using the best scientific and commercial data available, the Secretaries of the Interior and Commerce may consider factors including:

(1) The degree to which the Delta outflow index indicates a higher level of flow available for diversion.

(2) Relevant physical parameters including projected inflows, turbidity, salinities, and tidal cycles.

(3) The real-time distribution of listed species.

(c) OTHER ENVIRONMENTAL PROTECTIONS.—

(1) STATE LAW.—The actions of the Secretary of the Interior and the Secretary of Commerce under this section shall be consistent with applicable regulatory requirements under State law.

(2) FIRST SEDIMENT FLUSH.—During the first flush of sediment out of the Delta in each water year, and provided that such determination is based upon objective evidence, the Secretary of the Interior shall manage OMR flow pursuant to the portion of the smelt biological opinion that protects adult Delta smelt from the first flush if required to do so by the smelt biological opinion.

(3) APPLICABILITY OF OPINION.—This section shall not affect the application of the salmonid biological opinion from April 1 to May 31, unless the Secretary of Commerce finds that some or all of such applicable requirements may be adjusted during this time period to provide emergency water supply relief without resulting in additional adverse effects on listed salmonid species beyond the range of the effects anticipated to occur to the listed salmonid species for the duration of the salmonid biological opinion using the best scientific and commercial data available. In addition to any other actions to benefit water supply, the Secretary of the Interior and the Secretary of Commerce shall consider allowing through-Delta water transfers to occur during this period if they can be accomplished consistent with section 3405(a)(1)(H) of the Central Valley Project Improvement Act and other applicable law. Water transfers solely or exclusively through the State Water Project are not required to be consistent with subsection (a)(1)(H) of the Central Valley Project Improvement Act.

(4) MONITORING.—During operations under this section, the Commissioner of Reclamation, in coordination with the Fish and Wildlife Service, National Marine Fisheries Service, and California Department of Fish and Wildlife, shall undertake expanded monitoring programs and other data gathering to improve the efficiency of operations for listed species protections and Central Valley Project and State Water Project water supply to ensure incidental take levels are not exceeded, and to identify potential negative impacts, if any.

(d) EFFECT OF HIGH OUTFLOWS.—When exercising their authorities to capture peak flows pursuant to subsection (c), the Secretary of the Interior and the Secretary of Commerce shall not count such days toward the 5-day and 14-day running averages of tidally filtered daily Old and Middle River flow requirements under the smelt biological opinion and salmonid biological opinion, unless doing so is required to avoid additional adverse effects on

listed fish species beyond those anticipated to occur through implementation of the smelt biological opinion and salmonid biological opinion using the best scientific and commercial data available.

(e) LEVEL OF DETAIL REQUIRED FOR ANALYSIS.—In articulating the determinations required under this section, the Secretary of the Interior and the Secretary of Commerce shall fully satisfy the requirements herein but shall not be expected to provide a greater level of supporting detail for the analysis than feasible to provide within the short timeframe permitted for timely real-time decisionmaking in response to changing conditions in the Delta.

SEC. 4004. CONSULTATION ON COORDINATED OPERATIONS.

(a) RESOLUTION OF WATER RESOURCE ISSUES.—In furtherance of the policy established by section 2(c)(2) of the Endangered Species Act of 1973, that Federal agencies shall cooperate with State and local agencies to resolve water resource issues in concert with conservation of endangered species, in any consultation or reconsultation on the coordinated operations of the Central Valley Project and the State Water Project, the Secretaries of the Interior and Commerce shall ensure that any public water agency that contracts for the delivery of water from the Central Valley Project or the State Water Project that so requests shall—

(1) have routine and continuing opportunities to discuss and submit information to the action agency for consideration during the development of any biological assessment;

(2) be informed by the action agency of the schedule for preparation of a biological assessment;

(3) be informed by the consulting agency, the U.S. Fish and Wildlife Service or the National Marine Fisheries Service, of the schedule for preparation of the biological opinion at such time as the biological assessment is submitted to the consulting agency by the action agency;

(4) receive a copy of any draft biological opinion and have the opportunity to review that document and provide comment to the consulting agency through the action agency, which comments will be afforded due consideration during the consultation;

(5) have the opportunity to confer with the action agency and applicant, if any, about reasonable and prudent alternatives prior to the action agency or applicant identifying one or more reasonable and prudent alternatives for consideration by the consulting agency; and

(6) where the consulting agency suggests a reasonable and prudent alternative be informed—

(A) how each component of the alternative will contribute to avoiding jeopardy or adverse modification of critical habitat and the scientific data or information that supports each component of the alternative; and

(B) why other proposed alternative actions that would have fewer adverse water supply and economic impacts are inadequate to avoid jeopardy or adverse modification of critical habitat.

(b) INPUT.—When consultation is ongoing, the Secretaries of the Interior and Commerce shall regularly solicit input from and report their progress to the Collaborative Adaptive Management

Team and the Collaborative Science and Adaptive Management Program policy group. The Collaborative Adaptive Management Team and the Collaborative Science and Adaptive Management Program policy group may provide the Secretaries with recommendations to improve the effects analysis and Federal agency determinations. The Secretaries shall give due consideration to the recommendations when developing the Biological Assessment and Biological Opinion.

(c) MEETINGS.—The Secretaries shall establish a quarterly stakeholder meeting during any consultation or reconsultation for the purpose of providing updates on the development of the Biological Assessment and Biological Opinion. The quarterly stakeholder meeting shall be open to stakeholders identified by the Secretaries representing a broad range of interests including environmental, recreational and commercial fishing, agricultural, municipal, Delta, and other regional interests, and including stakeholders that are not state or local agencies.

(d) CLARIFICATION.—Neither subsection (b) or (c) of this section may be used to meet the requirements of subsection (a).

(e) NON-APPLICABILITY OF FACA.—For the purposes of subsection (b), the Collaborative Adaptive Management Team, the Collaborative Science and Adaptive Management Program policy group, and any recommendations made to the Secretaries, are exempt from the Federal Advisory Committee Act.

SEC. 4005. PROTECTIONS.

(a) APPLICABILITY.—This section shall apply only to sections 4001 through 4006.

(b) OFFSET FOR STATE WATER PROJECT.—

(1) IMPLEMENTATION IMPACTS.—The Secretary of the Interior shall confer with the California Department of Fish and Wildlife in connection with the implementation of the applicable provisions of this subtitle on potential impacts to any consistency determination for operations of the State Water Project issued pursuant to California Fish and Game Code section 2080.1.

(2) ADDITIONAL YIELD.—If, as a result of the application of the applicable provisions of this subtitle, the California Department of Fish and Wildlife—

(A) determines that operations of the State Water Project are inconsistent with the consistency determinations issued pursuant to California Fish and Game Code section 2080.1 for operations of the State Water Project; or

(B) requires take authorization under California Fish and Game Code section 2081 for operation of the State Water Project;

in a manner that directly or indirectly results in reduced water supply to the State Water Project as compared with the water supply available under the smelt biological opinion and the salmonid biological opinion; and as a result, Central Valley Project yield is greater than it otherwise would have been, then that additional yield shall be made available to the State Water Project for delivery to State Water Project contractors to offset that reduced water supply, provided that if it is necessary to reduce water supplies for any Central Valley Project authorized uses or contractors to make available to the State

Water Project that additional yield, such reductions shall be applied proportionately to those uses or contractors that benefit from that increased yield.

(3) NOTIFICATION RELATED TO ENVIRONMENTAL PROTECTIONS.—The Secretary of the Interior and Secretary of Commerce shall—

(A) notify the Director of the California Department of Fish and Wildlife regarding any changes in the manner in which the smelt biological opinion or the salmonid biological opinion is implemented; and

(B) confirm that those changes are consistent with the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(4) SAVINGS.—Nothing in the applicable provisions of this subtitle shall have any effect on the application of the California Endangered Species Act (California Fish and Game Code sections 2050 through 2116).

(c) AREA OF ORIGIN AND WATER RIGHTS PROTECTIONS.—

(1) IN GENERAL.—The Secretary of the Interior and the Secretary of Commerce, in carrying out the mandates of the applicable provisions of this subtitle, shall take no action that—

(A) diminishes, impairs, or otherwise affects in any manner any area of origin, watershed of origin, county of origin, or any other water rights protection, including rights to water appropriated before December 19, 1914, provided under State law;

(B) limits, expands or otherwise affects the application of section 10505, 10505.5, 11128, 11460, 11461, 11462, 11463 or 12200 through 12220 of the California Water Code or any other provision of State water rights law, without respect to whether such a provision is specifically referred to in this section; or

(C) diminishes, impairs, or otherwise affects in any manner any water rights or water rights priorities under applicable law.

(2) EFFECT OF ACT.—

(A) Nothing in the applicable provisions of this subtitle affects or modifies any obligation of the Secretary of the Interior under section 8 of the Act of June 17, 1902 (32 Stat. 390, chapter 1093).

(B) Nothing in the applicable provisions of this subtitle diminishes, impairs, or otherwise affects in any manner any Project purposes or priorities for the allocation, delivery or use of water under applicable law, including the Project purposes and priorities established under section 3402 and section 3406 of the Central Valley Project Improvement Act (Public Law 102–575; 106 Stat. 4706).

(d) NO REDIRECTED ADVERSE IMPACTS.—

(1) IN GENERAL.—The Secretary of the Interior and Secretary of Commerce shall not carry out any specific action authorized under the applicable provisions of this subtitle that would directly or through State agency action indirectly result in the involuntary reduction of water supply to an individual, district, or agency that has in effect a contract for water with the State Water Project or the Central Valley Project, including Settlement and Exchange contracts, refuge contracts, and Friant Division contracts, as compared to the water supply

that would be provided in the absence of action under this subtitle, and nothing in this section is intended to modify, amend or affect any of the rights and obligations of the parties to such contracts.

(2) ACTION ON DETERMINATION.—If, after exploring all options, the Secretary of the Interior or the Secretary of Commerce makes a final determination that a proposed action under the applicable provisions of this subtitle cannot be carried out in accordance with paragraph (1), that Secretary—

(A) shall document that determination in writing for that action, including a statement of the facts relied on, and an explanation of the basis, for the decision; and

(B) is subject to applicable law, including the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(e) ALLOCATIONS FOR SACRAMENTO VALLEY WATER SERVICE CONTRACTORS.—

(1) DEFINITIONS.—In this subsection:

(A) EXISTING CENTRAL VALLEY PROJECT AGRICULTURAL WATER SERVICE CONTRACTOR WITHIN THE SACRAMENTO RIVER WATERSHED.—The term "existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed" means any water service contractor within the Shasta, Trinity, or Sacramento River division of the Central Valley Project that has in effect a water service contract on the date of enactment of this subtitle that provides water for irrigation.

(B) YEAR TERMS.—The terms "Above Normal", "Below Normal", "Dry", and "Wet", with respect to a year, have the meanings given those terms in the Sacramento Valley Water Year Type (40–30–30) Index.

(2) ALLOCATIONS OF WATER.—

(A) ALLOCATIONS.—Subject to paragraph (3), the Secretary of the Interior shall make every reasonable effort in the operation of the Central Valley Project to allocate water provided for irrigation purposes to each existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed in accordance with the following:

(i) Not less than 100 percent of the contract quantity of the existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed in a "Wet" year.

(ii) Not less than 100 percent of the contract quantity of the existing Central Valley Project agricultural water service Contractor within the Sacramento River Watershed in an "Above Normal" year.

(iii) Not less than 100 percent of the contract quantity of the existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed in a "Below Normal" year that is preceded by an "Above Normal" or "Wet" year.

(iv) Not less than 50 percent of the contract quantity of the existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed in a "Dry" year that is preceded by a "Below Normal", "Above Normal", or "Wet" year.

(v) In any other year not identified in any of clauses (i) through (iv), not less than twice the allocation percentage to south-of-Delta Central Valley Project agricultural water service contractors, up to 100 percent.

(B) EFFECT OF CLAUSE.—In the event of anomalous circumstances, nothing in clause (A)(v) precludes an allocation to an existing Central Valley Project agricultural water service contractor within the Sacramento River Watershed that is greater than twice the allocation percentage to a south-of-Delta Central Valley Project agricultural water service contractor.

(3) PROTECTION OF ENVIRONMENT, MUNICIPAL AND INDUSTRIAL SUPPLIES, AND OTHER CONTRACTORS.—

(A) ENVIRONMENT.—Nothing in paragraph (2) shall adversely affect any protections for the environment, including—

(i) the obligation of the Secretary of the Interior to make water available to managed wetlands pursuant to section 3406(d) of the Central Valley Project Improvement Act (Public Law 102–575; 106 Stat. 4722); or

efficiently to maximize fish and water supply benefits; and

(iii) science-based recommendations developed by any of the persons or entities described in paragraph (4)(B) to inform the agencies' real-time decisions.

(C) WINTER MONITORING.—During the period between December 1 and March 31, if suspended sediment loads enter the Delta from the Sacramento River, and the suspended sediment loads appear likely to raise turbidity levels in the Old River north of the export pumps from values below 12 Nephelometric Turbidity Units (NTUs) to values above 12 NTUs, the Secretary of the Interior shall—

(i) conduct daily monitoring using appropriate survey methods at locations including the vicinity of Station 902 to determine the extent to which adult Delta smelt are moving with turbidity toward the export pumps; and

(ii) use results from the monitoring under subparagraph (A) to determine how increased trawling can inform daily real-time Central Valley Project and State Water Project operations to maximize fish and water supply benefits.

(3) PERIODIC REVIEW OF MONITORING.—Not later than 1 year after the date of enactment of this subtitle, the Secretary of the Interior shall—

(A) evaluate whether the monitoring program under paragraph (2), combined with other monitoring programs for the Delta, is providing sufficient data to inform Central Valley Project and State Water Project operations to maximize the water supply for fish and water supply benefits; and

If such amount is $5,000,000 or greater, such cost shall be repaid as provided by applicable reclamation law;

(C) provide that power revenues will not be available to aid in repayment of construction costs allocated to irrigation under the contract; and

An estimate of the remaining construction costs, as adjusted, shall be provided by the Secretary to the contractor no later than 90 days after receipt of the request of contractor.

(B) The contract shall require that construction costs or other capitalized costs incurred after the effective date of the contract or not reflected in the rate schedule referenced in subparagraph (A), and properly assignable to such contractor, shall be repaid in not more than 5 years after notification of the allocation if such amount is a result of a collective annual allocation of capital costs to the contractors exercising contract conversion under this subsection of less than $5,000,000. If such amount is $5,000,000 or greater, such cost shall be repaid as provided by applicable reclamation law.

(a) FINDINGS.—Congress finds the following:

(1) In the Congressional Budget Office report titled "An Analysis of the Navy's Fiscal Year 2016 Shipbuilding Plan", the Office stated as follows: "To prevent the carrier force from declining to 10 ships in the 2040s, 1 short of its inventory

"(3)(A) The Secretary of Defense shall develop and implement a comprehensive strategy to optimize management practices across the defense commissary system and the exchange system that reduce reliance of those systems on appropriated funding without reducing benefits to the patrons of those systems or the revenue generated by nonappropriated fund entities or instrumentalities of the Department of Defense for the morale, welfare, and recreation of members of the armed forces.

"(B) The Secretary shall ensure that savings generated due to such optimization practices are shared by the defense commissary system and the exchange system through contracts or agreements that appropriately reflect the participation of the systems in the development and implementation of such practices.

"(C) If the Secretary determines that the reduced reliance on appropriated funding pursuant to subparagraph (A) is insufficient to maintain the benefits to the patrons of the defense commissary system, and if the Secretary converts the defense commissary system to a nonappropriated fund entity or instrumentality pursuant to paragraph (1) of section 2484(j) of this title, the Secretary shall transfer appropriated funds pursuant to paragraph (2) of such section to ensure the maintenance of such benefits.

"(3) The Secretary shall ensure that the defense commissary system implements the variable pricing program by conducting price comparisons using the methodology established for paragraph (2)(B) and adjusting pricing as necessary to ensure that pricing in the variable pricing program achieves overall savings to patrons that are consistent with the baseline savings established for the relevant region pursuant to such paragraph.

The requirements of section 2483 of this title shall not apply to the defense commissary system operating as a nonappropriated fund entity or instrumentality.

"(2) If the Secretary determines that the defense commissary system operating as a nonappropriated fund entity or instrumentality is likely to incur a loss in any fiscal year as a result of compliance with the savings requirement established in subsection (i), the Secretary shall authorize a transfer of appropriated funds available for such purpose to the commissary system in an amount sufficient to offset the anticipated loss. Any funds so transferred shall be considered to be nonappropriated funds for such purpose.

"(3)(A) The Secretary may identify positions of employees in the defense commissary system who are paid with appropriated

funds whose status may be converted to the status of an employee of a nonappropriated fund entity or instrumentality.

"(1) The term 'modular open system approach' means, with respect to a major defense acquisition program, an integrated business and technical strategy that—

"(A) employs a modular design that uses major system interfaces between a major system platform and a major system component, between major system components, or between major system platforms;

"(B) is subjected to verification to ensure major system interfaces comply with, if available and suitable, widely supported and consensus-based standards;

"(C) uses a system architecture that allows severable major system components at the appropriate level to be incrementally added, removed, or replaced throughout the life cycle of a major system platform to afford opportunities for enhanced competition and innovation while yielding—

"(i) significant cost savings or avoidance;

"(ii) schedule reduction;

"(iii) opportunities for technical upgrades;

"(iv) increased interoperability, including system of systems interoperability and mission integration; or

"(v) other benefits during the sustainment phase of a major weapon system; and

"(D) complies with the technical data rights set forth in section 2320 of this title.

"(2) The term 'major system platform' means the highest level structure of a major weapon system that is not physically mounted or installed onto a higher level structure and on which a major system component can be physically mounted or installed.

"(3) The term 'major system component'—

"(A) means a high level subsystem or assembly, including hardware, software, or an integrated assembly of both, that can be mounted or installed on a major system platform through well-defined major system interfaces; and

"(B) includes a subsystem or assembly that is likely to have additional capability requirements, is likely to change because of evolving technology or threat, is needed for interoperability, facilitates incremental deployment of capabilities, or is expected to be replaced by another major system component.

"(4) The term 'major system interface'—

"(A) means a shared boundary between a major system platform and a major system component, between major system components, or between major system platforms, defined by various physical, logical, and functional characteristics, such as electrical, mechanical, fluidic, optical, radio frequency, data, networking, or software elements; and

"(B) is characterized clearly in terms of form, function, and the content that flows across the interface in order to enable technological innovation, incremental improvements, integration, and interoperability.

"(5) The term 'program capability document' means, with respect to a major defense acquisition program, a document that specifies capability requirements for the program, such as a capability development document or a capability production document.

"(A) the program incorporates clearly defined major system interfaces between the major system platform and major system components, between major system components, and between major system platforms;

"(B) such major system interfaces are consistent with the widely supported and consensus-based standards that exist at the time of the milestone decision, unless such standards are unavailable or unsuitable for particular major system interfaces; and

"(C) the Government has arranged to obtain appropriate and necessary intellectual property rights with respect to such major system interfaces upon completion of the development of the major system platform; or

"(2) in the case of a program that does not use a modular open system approach, that the use of a modular open system approach is not practicable.

"§ 2446c. Requirements relating to availability of major system interfaces and support for modular open system approach

10 USC 2446c.

"The Secretary of each military department shall—

"(1) coordinate with the other military departments, the defense agencies, defense and other private sector entities, national standards-setting organizations, and, when appropriate, with elements of the intelligence community with respect to the specification, identification, development, and maintenance of major system interfaces and standards for use in major system platforms, where practicable;
