Information to Know

The HIOS MLR module will begin accepting data on Excel templates (MLR Annual Reporting Form) beginning June 30, 2018. Users will be able to download the blank MLR templates in advance of that date.

The 2017 MLR Form and Instructions are currently under review by the Office of Management and Budget (OMB). The Form is therefore subject to change. An issuer who uses the Form published in HIOS' MLR module on June 1, 2018 will be deemed in compliance with the requirement to file its MLR data on a form prescribed by the Secretary even if that form differs from what is ultimately approved.

- The list is also be used to verify the appropriate amount of MLR templates have being submitted.
- Uploader users are not able to download the pre-populated MLR templates until issuer associations are confirmed.

Agenda – Reporting

- Changes to the 2017 MLR Annual Reporting Form
- Data Aggregation
- MLR Calculator
- Data Validations
- Companies with only small blocks of grandfathered business

2017 MLR Annual Reporting Form Changes

Main Changes to the MLR Annual Reporting Form for 2017:

- Deleted risk corridors columns in Parts 1-3 and lines in Part 3 related to the risk corridors calculations.
 - Transitional reinsurance and risk corridors amounts related to prior benefit years must still be reported on Part 3 Lines 1.5 and 1.7, respectively (as well as any such amounts deferred last year in connection with new business on Part 2, if applicable).
- Added new Line 4.6 on Part 1 to effectuate the standardized QIA reporting option.
- Added new Line 5.5c on Part 1 to collect data on employment taxes separately from other non-deductible taxes.

Aggregating Experience

All issuers are required to aggregate three years of experience

- Enter 2017 data in Parts 1 and 2; Part 3 Column CY; and Part 4 Sections 1-3
- Enter 2016 data in Part 3 Column PY1; and Part 4 Section 4
 - Restate 2016 incurred claims (including reserves and the allowable fraud reduction expense) as of 3/31/2018 in Part 3 Line 1.2 Column PY1
- Enter 2015 data in Part 3 Column PY2
 - Restate 2015 incurred claims (including reserves and allowable fraud reduction expenses) as of 3/31/2018 on Part 3 Line 1.2 Column PY2.
- Aggregate data for 2015, 2016 & 2017 in Part 3 Total Column
 - MLRs are calculated using aggregated data
 - Rebates are calculated using only 2017 adjusted premium

MLR Calculator

- CMS will post an Excel calculator tool with built-in MLR and rebate calculations on the CCIIO website
- To use the MLR Calculator, enter:
 - Issue State and Federal tax exempt status in Company Information tab
 - 2017 data in white cells of Parts 1 and 2
 - 2015 and 2016 data in white cells of PY2 and PY1 columns, respectively, in Part 3
 - Average deductible in Part 3

MLR Calculator (cont'd)

- After the MLR Calculator calculates the values in all green cells, copy the data into the 2017 MLR Annual Reporting Form (downloaded from HIOS) using one of the following methods:
 - Use the "Copy to HIOS Template" macro in the Start Here tab of the Calculator to copy the entire form (Parts 1-5)
 - Note that this will overwrite any information already entered on the HIOS template with information entered on the MLR Calculator
 - **OR** –
 - Manually copy and "paste values" into the HIOS MLR template
 - Note that you cannot paste over gray cells that divide sections or correspond to purely descriptive lines

Data Validations

- Submissions undergo several automated data checks in HIOS
 - Validation *errors* (e.g. text entered in a numeric field) must be corrected prior to attestation
 - Validation *warnings* indicate unusual data (e.g. negative member months) but do not prevent a user from attesting
- Warning emails sent to the issuer only contain some of the validation failures
- The full list of validation failures related to a particular MLR submission can be found on the Warning and Comparison Report in HIOS
- Issuers should review both the validation errors and warnings in their respective HIOS Reports to ensure accuracy and completeness of the data submitted

Warning and Comparison Report

- The Warning and Comparison Report is available on the “View Data” page in HIOS
- The report has four tabs:
 - Validation Warnings: Inconsistencies and unusual data on a state report
 - Grand Total Warnings: Inconsistencies and unusual data on the Grand Total report
 - MLR Calculation Tab: Discrepancies between user-entered values and HIOS-calculated values
 - SHCE/MLR-A Warnings: Discrepancies between an issuer’s 2017 SHCE values (as of 4/20/18) and the values reported in the “12/31” columns of the 2017 MLR Annual Reporting Form

Small Blocks of Grandfathered Business Criteria

Issuers do not have to complete all sections of the 2017 MLR Annual Reporting Form if they satisfy all of the following criteria:

1. Ceased offering health insurance coverage in every market and state in which it is licensed to offer health insurance coverage;
2. Have only grandfathered health plans in closed blocks of business that are in run-off;
3. Are exempted by the domiciliary state from filing an SHCE or similar state filing;
4. Have less than 1,000 life years nationwide (combined for all health insurance coverage) for 2017; and
5. Have fewer than 1,000 life-years (combined for 2015+2016+2017) in each state market where they provide coverage.

Reporting Small Blocks of Grandfathered Business

An issuer that meets all of the criteria should:

- Select “Yes” in the “small closed blocks of business” box on the HIOS “company-issuer association” screen
- Complete only Part 3 Line 3.1 for all columns (PY2, PY1, CY, Total) of the MLR Annual Reporting Form in every applicable state and market
- Use the HIOS “supplemental upload” function to submit:
 - Documentation of a filing exemption from the domiciliary state
 - A statement affirming that the issuer meets the small closed block criteria
- Review and attest to the submission
