

NOTES

The following transcription is intended only for performing purpose and doesn't seek any critical goal.

The key, notes' values, accidents and colourings are as in the original manuscript, apart from:

- the perfect breves and the perfect brevis rests are dotted.

The C clefs are transposed in G clef and modern tenor clefs.

The coloured notes are to be performed as "hemiolæ" except the coloured second half of the ligaturæ followed by coloured minimæ, in the Superius and Altus, that are to be performed as a dotted minima plus a semiminima (see what are doing the other parts in the same time).

Instead of marking the "ligaturæ" with the usual square brackets, I tried to keep their original shape, as far as possible in the score alignment, to make them more visible. To represent the notes' values I used the following rules (simplifying the old ones):

- the left upstemmed notes are semibreves
- the notes without stem are breves
- the right downstemmed notes are longæ

I decided to keep the original manuscript's text placement, positioned above the staves, to leave the performers the freedom to make the effective text placement at their own judgement.

In the music before the baroque, the Time Signatures are intended just only as "time" prescription, i.e. which note value as to be counted (mensura) and how the different note values are to be divided (perfection and imperfection). This music is above all a vocal music and its rhythm (the accents) is based upon the text rhythm (the text accents) either following or contrasting it. The text rhythm being not modular by definition, forcing a bar division, i.e. a modular rhythm, upon this music is a theoretical error involving practical ones: to put the accents in the wrong places and to prevent a correct understanding of the melodic flowing.

The single parts are put together in score for a better overall sight of the harmonic, melodic and rhythmic structure of the composition.

I corrected what I presumed to be errors but, as I'm not a professional music paleography scholar, if you have any doubt you can download the fac simile of the manuscript from the following address:

http://www.trentinocultura.net/catalogo/manoscrittimusicali/portal/server.pt?open=514&objID=19772&parentname=CommunityPage&parentid=1&mode=2&in_hi_userid=19324&cached=true

Those peoples who are interested in the mensural notation can find useful to visit the following website (only Italian, sorry):
